

CribMaster PDT Scanner

The PDT 8100 is the first Pocket PC device available with multiple keyboard options, the PDT 8100 is a versatile, large-screen handheld that delivers the functionality of Pocket PC with the convenience of tactile, key-based data entry. A great scanner design, a great scan engine and a great CribMaster application make the 8100 the obvious choice for your needs.

CMScan is a Windows CE application that allows the 8100 become an integral part of CribMaster and increase CribMaster scanner functionality. Several new functions come standard with the 8100 which adds great capability to your scanner usage.

CribMaster PDTs allow you to:

- Bar Code or Key Enter Data
- Issue and Receive Items
- Return Used Items
- Cycle Count
- Quantity Adjustments *
- Assemble Kits
- Replenish Kits *
